

STUDY BUDDY

Warm, paper study room. Soft sage primary, terracotta warmth, rounded cards, friendly sans. Playful but grown-up — nothing shouts.

1 · COLOUR PALETTE

 App Paper #f3ecdff Window background — warm cream wash with faint sage/terracotta blooms	 Card #faf6ee Project cards & panels — the lightest paper
 Header / Rail #fbf7ef Top bar and companion rail fill	 Ink #3d3630 Primary text, project titles
 Muted #8b8175 Metadata, captions, subject-type labels	 Sage #7a9e7f PRIMARY accent — buttons, rings, active nav, XP bar
 Sage Tint #e4eee1 Active-nav ground, level pill, soft fills	 Gold Star #d9a441 Star-student marker ONLY — never a surface

2 · FONTS

Quicksand	Display — wordmark, section titles, project titles, ring numbers (600/700, rounded terminals)
Nunito	Body & UI — nav, buttons, progress text, subject list (700/800)
Space Mono	Eyebrow labels, metrics, timestamps, the "study log" stamp — quiet typewriter counterpoint

3 · BUTTON TREATMENT

- Soft 12px radius, sentence case (NOT all-caps) — friendly, not shouty.
- Primary (Continue Reading): solid subject-accent fill, white text, 2px bottom offset shadow → looks gently pressable.
- Secondary (Dossier): #f0e8d8 fill, #6a6153 text, 1px #e2d6bf border.
- Empty slot: 2px dashed #d8c9ae outline on #f6efe0, muted "+ Add Project".
- Trailing → arrow on primary actions; keep letter-spacing near 0.

4 · PANEL / CARD

- Card fill #faf6ee, 1px #e7dcc8 border, 18px radius — soft rounded corners throughout.
- Layered shadow: 0 2px 0 #efe6d4 (paper lip) + 0 10px 22px rgba(120,100,70,,10) (soft lift).
- Companion rail is a tall card: portrait + speech bubble ("Ready when you are."), name, Lv pill, XP bar, star-student line, subject list.
- Progress ring 150px, 12px stroke, ROUND caps — track #ece2d0, fill = subject accent.
- Count modes (sessions / loaves) never fake a %: ring shows a dotted track + big centre number instead of an arc.

5 · BORDER / SHADOW / GLOW

- 1px hairlines at #e7dcc8 (cards) / #e6dcc9 (header).
- Tracks & rules use #ece2d0; empty-slot outline dashes in #d8c9ae.
- No glow anywhere. Depth comes from the soft paper-lip + drop shadow only.

6 · BACKGROUND

- App base #f3ecdff with two faint radial blooms: sage top-left (14%), terracotta bottom-right (12%).
- No noise texture — clean matte paper. The warmth carries it.
- Cards sit directly on the wash; rail and header are a half-step lighter (#fbf7ef).

7 · BADGE / STATUS LABEL

- Subject-type label = Space Mono caps + a coloured dot (subject accent), muted ink.
- Level chip: "Lv 7" in Space Mono on a sage-tint pill (#e4eee1), no border.
- Surveillance touch stays LIGHT: "STUDY LOG · observed" in a dashed #d6e9b3 pill, muted — a study log, not an alarm.
- Star-student: a single gold ★ + "Star student this month". Never turn XP into a scoreboard.

8 · HOW TO APPLY WITHOUT CHANGING LAYOUT

- Keep the Academy layout fixed. Set --bg-app #f3ecdff, --bg-card #faf6ee, --panel #fbf7ef, --ink #3d3630, --muted #8b8175, --accent #7a9e7f.
- Round every radius UP to 12–18px. Buttons and titles sentence-case, never uppercase.
- Subject accents (used sparingly, one per project): Classics #c1744a · Philosophy #6a6fb0 · Creative Writing #3f958c · Practical Studies #c19a3e.
- Each project card tints ONLY its dot, ring fill, and primary button with its subject accent — everything else stays neutral paper.
- Gold #d9a441 is reserved for the star-student marker; never use it as a fill or on buttons.
- Fonts: Quicksand (display) · Nunito (body) · Space Mono (labels/metrics). Load 600–800 weights.
